a definitive sweeping account of the underground railroad's long overlooked maritime origins from a pre eminent scholar of atlantic history and the award winning author of the slave ship as many as 100 000 enslaved people fled successfully from the horrors of bondage in the antebellum south finding safe harbor along a network of passageways across north america now known as the underground railroad yet imagery of fugitives ushered clandestinely from safe house to safe house fails to capture the full breadth of these harrowing journeys many escapes took place not by land but by sea deeply researched and grippingly told freedom ship offers a groundbreaking new look into the secret world of stowaways and the vessels that carried them to freedom across the north and into canada sprawling through the intricate riverways of the carolinas to the banks of the chesapeake bay to boston's harbors these tales illuminate the little known stories of freedom seekers who turned their sights to the sea among them the legendary abolitionist frederick douglass and harriet tubman one of the underground railroad's most famous architects marcus rediker one of the leading scholars of maritime history puts his command of archival research on full display in this luminous portrait of the atlantic waterfront as a place of conspiracy mutiny and liberation freedom ship is essential reading for anyone looking to understand the complete story of one of north america's most significant historical moments

beginning in the late seventeenth century and concluding with the abolition of the atlantic slave trade almost dead reveals how the thousands of captives who lived bled and resisted in the black urban atlantic survived to form dynamic communities michael lawrence dickinson uses cities with close commercial ties to shed light on similarities variations and linkages between urban atlantic slave communities in mainland america and the caribbean the study adopts the perspectives of those enslaved to reveal that in the eyes of the enslaved the distinctions were often of degree rather than kind as cities throughout the black urban atlantic remained spaces for black oppression and resilience the tenets of subjugation remained all too similar as did captives need to stave off social death and hold on to their humanity almost dead argues that urban environments provided unique barriers to and avenues for social rebirth the process by which african descended peoples reconstructed their lives individually and collectively after forced exportation from west africa this was an active process of cultural remembrance continued resistance and communal survival it was in these urban slave communities within the connections between neighbors and kinfolk that the enslaved found the physical and psychological resources necessary to endure the seemingly unendurable whether sites of first arrival commodification sale short term captivity or lifetime enslavement the urban atlantic shaped and was shaped by black lives

set along both the physical and social margins of the british empire in the second half of the seventeenth century everyday life in the early english caribbean explores the construction of difference through the everyday life of colonial subjects jenny shaw examines how marginalized colonial subjects irish and africans contributed to these processes although their lives are obscured by sources constructed by elites shaw overcomes these constraints by pushing methodological boundaries to fill in the gaps silences and absences that dominate the historical record and uncovering perspectives that would otherwise remain obscured shaw makes clear that each group persisted in its own cultural practices irish and africans also worked within and challenged the limits of the colonial regime shaw s research demonstrates the extent to which hierarchies were in flux in the early modern caribbean allowing even an outcast servant to rise to the position of island planter and underscores the fallacy that racial categories of black and white were the sole arbiters of difference in the early english caribbean

cultural memories of origin focuses on how the second maritime leg of the african slave trade commonly referred to as the middle passage is represented in select literary and artistic works of african american culture the book analyses several discursive aesthetic and political shifts in the memory production about the transatlantic slave trade and discusses their ramifications for the construction of black identity in the u s given the deracinating nature that the middle passage experience had on african subjects as well as the representational difficulties in portraying this rupture the book s analytical framework incorporates theories of trauma by addressing the productive contrast and the methodological differences that exist in between what is in general deemed historical scholarship on the one hand and cultural memory on the other the book contributes to the ongoing discussion about the possibility of an involuntary inheritability of traumatic events

this volume explores mutiny and maritime radicalism in its full geographic extent during the age of revolution

the central axiom of teaching the transatlantic eighteenth century is that the classroom functions as a site for research and collaboration not only as a space that reflects the research of individual teacher scholars but as a generative site to put ideas theories and methodologies into play whereas transatlanticism has transformed research practices over the last decade the present collection is concerned with exploring what this transformation looks like in the classroom and how the classroom continues to shape research practices in the field contributors address issues such as how the traffic in ideas people and commodities between europe africa and the new world are considered in classroom settings how inter and intra departmental collaborations reshape our approaches to teaching the eighteenth century how and why transatlantic studies can function as an introduction to college study and how it can help more advanced students to revise their notions of nation place and identity by now there are a number of anthologies available to help instructors determine what transatlantic material to teach but none that engage why and how to teach it or what teaching it can do for us our students and our profession rather than simply providing reading lists or a collection of anecdotes about lesson plans teaching the transatlantic eighteenth century emphasizes theorizing critical engagements with interdisciplinary focus on and the transformative potential of transatlantic studies the primary market for teaching the transatlantic eighteenth century is university college and community college professors researchers and students with three specific subgroups 1 teachers new to transatlantic studies teachers coming to transatlantic studies for the first time will find both suggestions for materials or topical units to be integrated into existing courses e g a unit on transatlantic exchange that could figure in an eighteenth century literature survey course and ideas for developing new courses altogether 2 teachers already teaching and or researching in the field of transatlantic studies such scholars will find material to broaden their approach to familiar courses and subjects inter or cross disciplinary focus new texts successful clusterings of texts or themes or approaches and ideas for team teaching or linking courses with other faculty 3 teachers involved in transatlantic studies programs especially those that focus on contemporary post wwii context e g at the university of dundee the university of north carolina chapel hill and the university of birmingham teaching the transatlantic eighteenth century will provide historical context for current geopolitical studies perspective on the dynamics and historical and political forces occurring in the eighteenth century and contributing to 19th 20th and 21st century politics nations and paradigms

meditations on the paradoxes generated around the ending of western slavery in his tour de force blind memory marcus wood read the visual archive of slavery in eighteenth and nineteenth century america and britain with a closeness and rigor that until then had been applied only to the written texts of that epoch blind memory changed the way we look at everything from a turner

seascape to a crude woodcut in a runaway slave advertisement the horrible gift of freedom brings the same degree of rigor to an analysis of the visual culture of atlantic emancipation wood takes a troubled and troubling look at the iconography inspired by the abolition of slavery across the atlantic diaspora why he asks did imagery showing the very instant of the birth of black slave freedom invariably personify liberty as a white woman where did the image of the enchained kneeling slave ubiquitous in abolitionist visual culture on both sides of the atlantic come from and most important why was freedom invariably depicted as a gift from white people to black people in order to assess what the inheritance of emancipation imagery means now and to speculate about where it may travel in the future wood spends the latter parts of this book looking at the 2007 bicentenary of the 1807 slave trade abolition act in this context a provocative range of material is analyzed including commemorative postage stamps museum exhibits street performances religious ceremonies political protests and popular film by taking a new look at the role of the visual arts in promoting the great emancipation swindle wood brings into the open the manner in which the slave power and its inheritors have single mindedly focused on celebratory cultural myths that function to diminish both white culpability and black outrage this book demands that the living lies developed around the memory of the emancipation moment in europe and america need to be not only reassessed but demolished
